

## Calcium lignosulfonate CAS

CAS # 8061-52-7

Information provided on Calcium lignosulfonate (8061-52-7) is for reference only and is subject to change. There is no warranty of accuracy or completeness of any information contained herein.

Columbia Analytical does not sell chemicals, but offers analytical lab testing to determine the presence of various elements and chemical compounds. Columbia Analytical may or may not offer testing for the specific analyte listed on this page. Please contact us for the latest tests available. Analytical testing dots

Chemical Name: [Calcium lignosulfonate](#)

CAS Number: 8061-52-7

Synonyms: calcium lignosulphonate, lignosulfonic acid calcium salt,

Use: granulating agent for ores, dispersing agent for clay slurries, compaction aid

Appearance: yellow powder

Melting Point: ca. 130 C (decompose)

Water Solubility: soluble

Stability: Stable. Incompatible with strong oxidizing agents.
